

Introducing V⁺ Value added displays from Rapiergroup

V.cost effective V.versatile V.different

Need a budget
conscious display
for any environment?

V⁺ is the answer.

We say spend your money wisely and spend less, with V⁺.

It's a creative way to form message environments to suit your needs that don't look like popups...and don't cost the Earth.

Rapiergroup adds the value – through creativity, through project management and through expert delivery. We can help you shape the end result in style.

V. impressive.

Value – economical and the answer to tight budgets with multiple configurations.

Added – use Rapiergroup’s marketing, brand and creative abilities to get the most out of the display you desire.

Display – we can form an impressive display of any kind, in any environment, but not at any price.

The totally versatile V⁺ range adapts to any space you need to fill, and you can rent or buy depending on your budget.

Small applications

Glide 10' x 10'

- 01 Whether meet and greet or AV demonstration is your need, V+ can do it. Reusable carpets, rented furniture and a Glide* system gives you the point of difference for spaces 10 x 10 or less. Glide has an 8 feet high timber core tower that can be vinyl finished to your needs. The tower holds up to a 37 inch monitor and has lighting to the rear side to illuminate the large oval shaped fabric backdrop graphic.
- 02 Numerous configurations can provide meet/greet and display peds, a walk-in space only or perhaps just display for products / demos? Glide packs away small and neat, is very easy to install and very flexible.

Small applications

Air 10' x 10'

- 03 The Air System suits spaces of 10x10, 10x20 and 10x30. This 10x10 set is quick and easy to assemble with 'thumb node' fixings, fabric central graphic and a Sintra stand off branding panel. It comes with a range of accessories for shelving, lit racks, lighting, canopies, etc. and a variety of peds from single counters to larger reception desks. Plexi fins at each side for additional branding or graphics can be added.
- 04 Use your space in any way, open for large product or an inviting meeting area or include peds for smaller product displays or up to 21 inch flat screen based technical demos.

03

04

Medium applications

Air 10' x 20'

05 Air system works up to 10x20 also. By linking Air systems together you can extend the display and stay at an 8 feet height, increasing space to include more meeting areas or products displays. As our designs show - the backdrop graphic improves the impact of your messaging.

06 A cleaner version of the Air system on a 10x20 space.

Medium applications

Lumiture Inline 10' x 20'

07 If a big message surface suits your need for a 10x20 or a 10x30, this offers a fabric graphic stretched between Lumiture aluminum frames with integrated side lighting. It keeps you at 8 feet high and gives clear branding and huge graphics as a backdrop to your display. More pedestals are available, of a modern feel, with plexi fronts and aluminum feet. Lumiture Inline works with Air systems fittings and accessories. The system has custom overlay panels for tailored branding and affordable customization.

08 Lumiture Inline works in varying configurations and with modern design furniture, cabinets and peds.

08

07

Medium applications

Lumiture Frames 10' x 20'

- 09 Suitable for inline and island displays. These work at heights of 8 feet for inlines and up to 12 and 16 feet for island displays for better branding visibility. Here we have combined a solid Luminents back wall with big graphics.
- 10 Luminents Frame works in all configurations with various furniture, cabinets and peds available. Towers are self supporting with feet for stability.

09

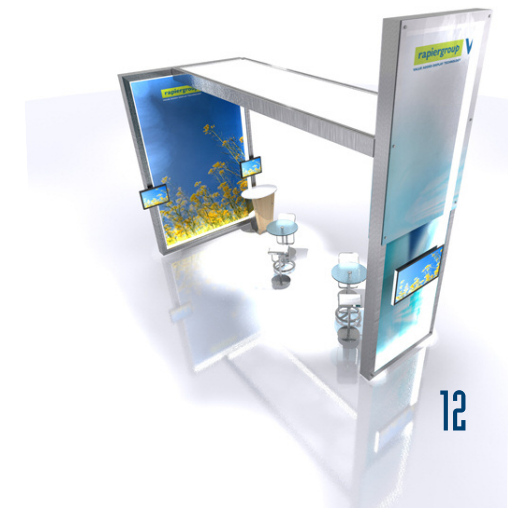

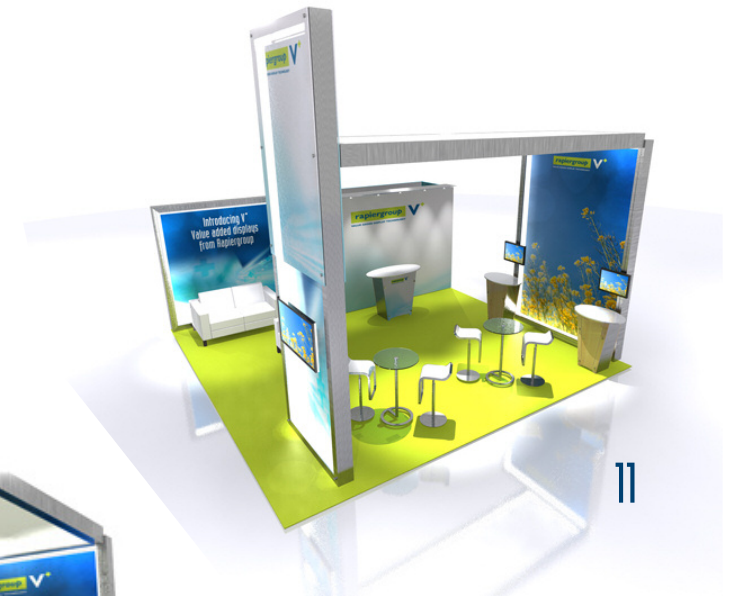

10

Larger configurations

Hybrid Custom 20' x 20'

- 10 The bigger you get - the better it gets. We have a range of Hybrid Custom solutions mixing system cores with custom display that adds impact to your 20x20, 20x30, 30x30 and 20x40 displays.
- 11 More individuality for your brand on the show floor through an economical approach.
- 12 Small or large island spaces - Hybrids can work to whatever display blend you are looking for with all kinds of peds, furniture, accessories and custom elements to compliment.

V. simple

So, what is V⁺?

A choice of Exponents based systems - Glide, Air, Luminents Inline, and Luminents Frames.

Glide - change the way you think about exhibiting in small spaces. A central tower holds an AV screen and a large fabric graphic backdrop.

Air - a perfect combination of portability and 'no-tool installation' structure. Comprises 2-3 lightweight shipping cases and structural functionality that holds up to 21-inch monitors, shelves, lit racks and lockable display cabinets. Apply it with tiled carpeting for a totally reusable display.

Lumiture - Inline / Frames - truly 'illuminated architecture'. Lightweight aluminum frames that hold fabric graphics with integrated side lighting, a varied range of display accessories and furniture. Component/tiled carpeting up to 20x20 sizes is also available with custom carpet and flooring suggested for sizes above.

Hybrids - Using Air or Luminents Inline or Frames with custom exhibit pieces on makes it even more individual for you with greater impact.

Rent or Buy - With any of the above we can price an affordable solution for you to choose to meet your needs and your budget.
